ABOUT OUR '54 COVER

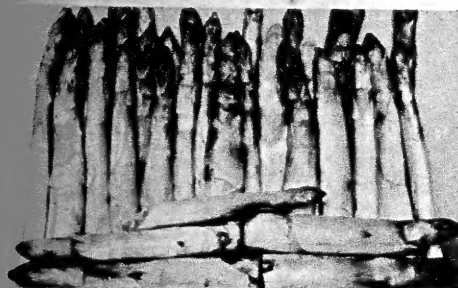

Possibly you are wondering about the unusual and inspiring cover on this 1954 issue—about the departure from staid designs and over-used groups of vegetables to a delightful portrayal of a wistful gardener. Perhaps you, too, are anxious for the weather and season to let your dream of a better home and garden become a reality.

With deep appreciation, we sincerely thank Artist Paul S. Plaschke of The Courier-Journal staff for so ably touching the hearts of all good gardeners, with his brush and oil paint. Plaschke is of a family of artists; his grandfather, Paul A., of The Times "Semaphore" cartoon fame; his father, Emil B., of The Times arts staff, and his uncle, Harvey Plaschke, of the Standard Rotogravure staff.

We hope you enjoy the cover and the complete issue, while doing your "Fireside Gardening." May we help you make your dream garden come true?

WITH Krilium® IN PLANT BEDS
SOIL CONDITIONER

Krilium soil conditioner keeps your plant bed soil in good tilth, reduces surface crusting, helps soil absorb water better. Therefore, seedlings grow faster, have stronger stalks, much better root systems and more fibrous roots. Plants pull more easily with less damage to hair roots. A good ball of earth comes with plants pulled from treated beds. This reduces wilt, insures a faster start on setting out.

Suppose your tobacco yield is about 1500 pounds per acre. At last year's prices this would yield \$750.00. The cost of the Krilium to treat an average plant bed (9'x100' or 12'x75') is only \$25.00. Thus you get your money back with profit the first year.

For easier transplanting and bulb planting, apply Krilium to loose dirt at bottom of hole; also mix it with dirt to be replaced. Krilium keeps soil crumbly and porous, lets fresh air and moisture get down to tender roots.

PREMIER PEAT MOSS The ALL ORGANIC SOIL CONDITIONER

GARDENS—Peat Moss aids the gardener by improving the texture of the soil. After Peat Moss is worked into the soil, the soil works easier and holds moisture longer. A one-inch layer of Peat improves the appearance of any flower garden and prohibits the growth of many weeds.

LAWNS—Many lawns suffer during hot dry periods in summer. The soil packs, becomes crusty and retards the growth of the small rootlets. Organic Peat Moss worked into the soil relieves this condition and improves the turf.

SHRUBS—Most nurserymen recognize the value of Peat Moss and work liberal quantities into the soil when transplanting evergreens and shrubs. A one-inch layer gives the planting a finished look, holds the moisture and reduces weed growth.

WINDOW BOXES, HOUSE PLANTS—Only a small quantity of Peat Moss is needed for window boxes and house plants. The average back yard soil can be improved enough with the addition of Peat Moss to raise beautiful plants.

Bunton TRIMMERS

for easier—faster—complete—
low-cost trimming and edging

Sidewalks, Trees, Flower Beds, Monuments, Walls, Roadways, Fences, Flush Markers, Hedges, Curbs, Shrubs, Lawns and Gardens. 6 Sizes: 8½-Inch, 10½-Inch, 12½-Inch, 14½-Inch, 16½-Inch, 18½-Inch.

Bunton Trimmers are powered by the famous Power Products 2-Cycle Engines. The automatic governor regulates power for heavy or light cutting.

Self-winding, recoil starters make starting easy without need to carry starter rope. The three wheel design eliminates scalping and gives a smooth even cut.

Pointed edger-guides direct all grass into the blade, giving a clean cut along and around walls, trees, curbs and walks.

A new extra large muffler quiets the engine and provides "hushed" power for operator comfort.

THE "DUZMORE"

Does more than trim and edge, for it cuts the full width of the unit. The suction-lift blade gives a clean, smooth job, mulching and evenly distributing the cuttings.

An automatic, semi-locking caster wheel prevents scalping, makes the unit easier to handle, gives a level cut and may be quickly locked in a fixed position for trimming and edging.

Grass is directed into the blade by the pointed edger-guides, up from the sidewalks or flush markers or away from walls, monuments and trees.
